protecting HEROES one at a time

FIRE PROTECTIVE GEAR

VELOCITY

designed for fast response

Velocity's ergonomic design is engineered to provide fire-fighters with an unrestricted full range of motion. Ultra FlexKnee triple pleated trousers with integrated belt and semi-high back work together to provide unsurpassed comfort. Velocity's Ultra FlexWing Expanded Back coat delivers a bind free reach. The new FlexElbow adds outer shell pleats combined with liner darts to provide a natural contour at the elbow while complementing the integrated seamless underarm bellows.

Also available for Proximity Aircraft Rescue Fire Fighting. Ask for the Vector Max series.

Pictured with optional VEL680 padded H back suspenders

Vector Max Series

VELOCITY SERIES: Meets or exceeds NFPA 1971, Current edition and OSHA requirements, and is UL certified.

Insulated Stand Up Collar and Throat Tab

Full coverage protection that easily folds over when not in use for maximum everyday comfort.

Ultra FlexWing Expanded Back

[Outer Shell and Inner Liner]
Enhances range of motion

Velocity Coats are recommended in 32 inch length. They are available in lengths from 29 to 45 inches.

3M Scotchlite®
Reflective Material

Nomex® Bartack Reinforcements

[Coat & Trousers]
Double row bartacks provide superior strength at the garment stress points

Integrated Belt

For superior comfort; makes suspenders optional. Belt is protected from excessive wear by an outer shell material channel.

Your Choice Trousers Back

Choose waist high with a 35" coat, semi-high with a 32" coat or high back with a 29" coat. Velocity is typically done with a 32" coat and semi-high back.

Fly Closure

Hook & Loop with Compression Snap Outer, Zipper Inner when integrated belt is chosen. Many other closures available without belt option.

28" inseam standard, customized in 1" increments

Ultra FlexKnees with triple pleats

For unrestricted knee mobility

Generous Seat Design

For added garment strength and comfort

Nomex® Triple Stitched

[Primary seams, coat & trousers]
Ensures maximum durability.

Garments are pictured with popular options.

YOU choose your pocket sizes, locations, reinforcements or linings. Tell us which accessories, trim configuration and closures fit your departments' needs. If you don't see the option that you are looking for... just ask for it.

Fitting / Measuring Guide

Important:

Your Veridian Limited coat and/or trouser sizing will be more accurate if you take extra care with measurements. The following list of measurements is necessary for both men's and women's garments.

Coats:

- 1. Chest size:** Measure loosely over clothing around the fullest part of the chest with the arms at rest. For individuals with broad shoulders, muscular arms and/or back, an additional over the arm-chest measure is extremely helpful. Again, measure loosely over fullest part of chest with arms at rest. Round up both measurements to nearest even size.
- 2. Sleeve length:** You should expect that Veridian's standard sleeve length per size would fit a vast majority of fire fighters. Otherwise, with arms straight down to side, measure from the base of the back of the neck, over the shoulder and down the arm to the base of the thumb.

Trousers:

- 3. Waist:** Measure around waist, over any clothing that would be worn under trousers. Typical men's measurement will be taken just above pant waist, or belt.
- 3a. Stomach:** Please include measurement around stomach for high back trousers.
- 4. Inseam:** Standard inseam lengths are available in one inch increments. Inseam length should be shorter than regular trouser inseam to prevent damage to cuffs. Measure from the crotch down the inside of the leg to the bottom of the ankle bone.
- 5. (Female) Hip:** Measure around the fullest part of the hip area.

yoc strap®

A Veridian Standard

Veridian is honored that you chose to wear our gear. Your safety is our first priority. Yoc Strap drag rescue device is standard on all NFPA compliant Veridian Structural and Proximity Coats.
