

VINYL COATED LOCKOUT HASP

- Scissor action hasps are available in 25 mm / 38 mm Dia Jaw size.
- In these hasps, the padlock fixing section is vinyl coated for better gripping & visibility.
- Accepts padlocks with a shackle diameter up to 9 mm. 6 or more locks can be installed on each hasp; depending on the holes provided.
- Hasps are manufactured from high tensile steel sheet which are electro-plated / powder coated to prevent rusting. In Yellow black hasps, Black Powder coating is done on steel.
- Besides 6 holes, 25 mm jaw size conventional vinyl coated hasps are also available from 3 to 24 holes.*

SCORPIO LOCKOUT HASP

Dual scissor action hasp is a type of scorpio lockout hasp with two different jaw sizes (20 mm & 45 mm of inner width) which adds to its versatility. This hasp is 5.35" in length and is made from tempered steel sheet; it accommodates up to 6 padlocks. It is available in Plated steel or in Red powder coating to resist rust. The hasp has an aluminium rivet in between which provides a smooth movement.

The hasp is also available in light weight aluminium - with 25 & 38 mm jaw sizes in chrome plated finish with 10 holes.

LOCKOUT HASP

STAINLESS STEEL HASP

Stainless Steel hasps are made as per internationally accepted designs. They are easy to use and acceptable at most of the isolation locking points.

RSG - VC SSH - S / P Hasps are manufactured from 304 stainless steel sheet and have a sleek aluminum rivet. They are duly vinyl coated at the padlock insert holes - for better gripping and visibility.

RSG - SSH - 25 is manufactured from 304 stainless steel sheet with a bright nickle plated finished using mixed aluminum die casted insert. Ideal for use in all industrial environments.

RSG - SSH - 25 FSS is complete Stainless Steel piece with SS rivet.

RSG - SSH Die casted 304 stainless steel hasps are most popular in industries with harsh / extreme corrosive environment. They are available in 3 & 5 mm shackle thickness sizes.

Cable lockouts are ideal for situations where there is a need to lockout multiple energy sources with one device or where the design/ placement of the energy sources prevents other types of lockouts from being used.

Use the flexible cable to tie off the energy source. The device holds the cable firmly and prevents it from loosening. Several padlocks can be put on the device to ensure the safety of workers.

They are flexible, cost-effective, easy-to-use, just as efficient as chains but are much lighter and visible.

MULTIPURPOSE CABLE LOCKOUT

ECONOMY MULTIPURPOSE CABLE LOCKOUT

Made of polypropylene.
Injection moulded one set construction, comprising of Stainless Steel nut and bolt for corrosion free / long lasting working.
Supplied with 2 Mtrs. Galvanized vinyl coated steel cable.
Patented easy GRIP & TWIST design.
Accepts 6 padlocks for numerous lockout applications.
Withstands Temperatures (+55° C to -20° C)
Cable can be ordered in 2 / 5 / 10 / 20 / 50 / 100 meter rolls

De Electric Cable

- For LOCKOUT purpose, some time small or large cables are required in Vinyl coated steel /Stainless Steel / De electrical cables with or without the loops.
- They can be ordered in any lengths from 1 feet to 200 meters.
- Vinyl coated steel cables are mostly available in Red colour.

VALVE LOCKOUT

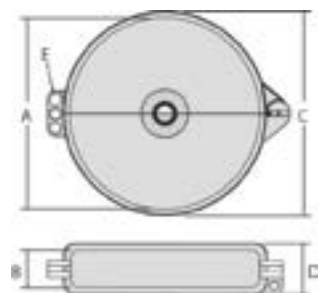

Valve lockouts are simple and effective in order to prevent unauthorized operation of valves. Valves come in a huge range of shapes, sizes and methods of operation. Whether you have Ball Valves, Gate Valves, Plug Valves, Globe Valves or Butterfly Valves; their method of operation determine the lockout device for the valve. Several valves are manually operated via a handwheel / lever / wrench or the valve might be power actuated e.g. electric motor, hydraulic or pneumatic actuator. Regardless of the method of operation, all valves can be locked out by our various available lockout solutions.

GATE VALVE LOCKOUT

- Virtually indestructible valve covers.
- Once locked, they rotate freely around the hand wheel & prevent the valve wheel from being turned.
- The strong polyurethane plastics make them resistant to cracking and abrasion.
- They are resistant to extreme weather and temperature conditions.
- Available in 5 sizes (Red color) Other colors are available on request (minimum quantity applicable).
- Padlock holes are available in each gate valve lockout device.
- Withstands temperatures from - 20°F to 200°F.
- Unique knockout center accommodates OS & Y or “rising stem” valves.
- Hasps and padlocks can be used to lock these lockouts.

Make a cutout with sharp blade for accommodating rising spindle stem valves

MODEL	GVL: Gate Valve Lockout
RSG - 02 - GVL	Fits on handle wheel dia from 25 to 63.5 mm (1" - 2½" inch)
RSG - 04 - GVL	Fits on handle wheel dia from 63.5 to 127 mm (2½" - 5" inch)
RSG - 06 - GVL	Fits on handle wheel dia from 127 to 165 mm (5" - 6½" inch)
RSG - 08 - GVL	Fits on handle wheel dia from 165 to 254 mm (6½" - 10" inch)
RSG - 10 - GVL	Fits on handle wheel dia from 25 to 63.5 mm (1" - 2½" inch)

METALLIC MULTIPURPOSE CABLE LOCKOUT

It adjusts to fit gate valves from 2.5 to 16.5 cm (1" to 6½" gate valve hand wheels) & 16.5 to 37.5 cm (6.5" to 14.75" gate valve hand wheels). Covers and rotates freely around the valve's wheel. Made of durable polypropylene / ABS. Resistant to extreme temperature changes - 13°F to +194°F. Compact design for easy carrying and storage.

RSG - AGV - BC	Adjustable Gate Valve Lockout - Big with Cutout (165 mm - 380 mm)

BALL VALVE LOCKOUT

- These easy to use lockouts, clamp over the valve lever - preventing the valve from being operated. BV - 01 can lock the small sized valves in both open or closed positions, whilst the larger BV - 01 EX / BV - 02 L can only be used in the closed position.
- These two piece, moulded lockouts can be installed on most of the ball valves available internationally.
- They are virtually indestructible. Inner slider is used for gripping the valve handle sleeves inside the cover.
- Once locked, they prevent valve handle from being turned.
- The strong polyurethane plastic make them resistant to cracking and abrasion.
- They are resistant to extreme weather & temperature conditions.
- Non conductive. Available in 4 colours.

MODEL	PRODUCT DESCRIPTION
RSG - BV 01	For Ball Valve - Pipe Dia 3/8" - 1/4" (Max Handle length 7 1/2")
RSG - BV 01 EX	For Ball Valve - Pipe Dia 1 1/2" - 2 1/2" (Max Handle length 10")
RSG - BV 02 L	For Ball Valve - Pipe Dia 2" - 8" (Large Size)

TOP RAIL BALL VALVE LOCKOUT

- Small Ball Valve Lockout device locks out the valves (for 12.5 to 31 mm dia pipes) in open or closed position.
- Large Ball Valve Lockout device locks out the valves (for 50 to 200 mm dia pipes) in closed position only.

MODEL	TR BVL : Top Rail Ball Valve Lockout

SETTABLE BALL VALVE LOCKOUT

- Used for precise Locking & closing / opening of the ball valves of various sizes and makes.
- Constructed from super tough nylon and stainless steel to avoid corrosion. Designed to lock out quarter-turn valves of varying sizes and geometric handle dimensions (round, square or flat) up to 1 - 1/4" thick x 1-5/8" wide and various lengths. Valves can also be locked in the ON or fixed positions for non lockout applications. To freeze the valve handle at an exact location attach the second Arm (Sold separately) to lock handle of 2 / 3 / 4 or 5 way Valves.
- Ideal for all kinds of usage areas / pipelines like gaseous, oils, liquids, air pressure pipes & valves etc.

UNIVERSAL VALVE/ CABLE LOCKOUT

- Versatile, rugged, easy to use, lightweight and chemical resistant lockout device.
- It's open ended clamp fits over closed rings, wide handles and large levers, T-handles and other hard-to-secure mechanical devices.
- Use two blocking arms to lock out 3 / 4 / 5 way valves.
- Injection moulded - special PVC grade / stainless steel components embedded Lockout.
- The clamp attaches to the butterfly valve lever, preventing the trigger handle from being squeezed.
- Multiple functioning with the help of vinyl coated steel cable and arms.
- Use cable attachment to lockout gate valves.
- Made from industrial grade stainless steel and nylon for rugged durability; giving chemical and corrosion resistance.
- This Universal Lockout is a modular construction which allows the user to add various accessories to make the device suitable for a large range of valves.
- Arms are available in different Stainless Steel Rod lengths / sizes.

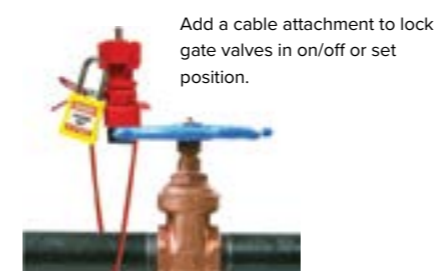

Use as a Butterfly Valve Lockout

Clamp attaches to butterfly valve lever, preventing trigger handle from being squeezed. Valve cannot be repositioned.

RSG-UVL

Use as a Gate Valve Lockout

Add a cable attachment to lock gate valves in on/off or set position.

RSG-UVL + C

Use as a Ball Valve Lockout

Use two locking arms to lockout 3 / 4 or 5-way valves or to lock valves in the throttled position for operational control.

RSG-UVL + 2SA

BUTTERFLY VALVE LOCKOUT CONVENTIONAL

When slid into position, the wedge on the slider section prevents the compression handle from being squeezed, preventing operation of the valve. Padlock is placed through the holes to ensure proper lockout. Hasps maybe used when multiple locking is required.

- Designed to lock most kinds of butterfly valves in the industries.
- Resistant to cracking and abrasion. Highly resistant to solvent and other chemical products.
- Available in 4 colours.
- Made of strong polypropylene plastic; Fully de - electric (non - conductive).
- They are resistant to extreme weather and temperature conditions making them suitable for outdoors.

**PLUG VALVE/
GLOBE VALVE
LOCKOUT**

Plug Valve Lockout secures a manually actuated plug valve with a stem diameter between 9.5 mm - 63.5 mm easily and effectively. The base of this lockout device remains in place on application and does not interfere with valve activation by removable handle / wrench. These devices are made of durable polypropylene. They are compact in size, highly visible and easy to use.

No need to match your lockout device for varying diameters and threads of cylinder caps. Our gas cylinder lockout is adjustable and installs in seconds.

CYLINDER LOCKOUT

GATE VALVE CYLINDER LOCKOUT

RSG - GVCL

- Designed with stem hole dia of 29 mm, made of polystyrene plastic.
- Prevents access to the valve handle.
- Easy application.
- Used to lockout propane cylinders on Forklift trucks.
- Designed to fit in tight spaces. Single padlock can be applied.
- GVCL with padlock cap.

MODEL	PRODUCT DESCRIPTION
RSG - GVCL	Gate Valve Cylinder Lockout

CYLINDER LOCKOUT

- Easy application.
- Prevent access to the valve handle.
- The unit encloses the valve head and is locked in place with two interlocking plates.
- Installed in seconds and provides quick and easy identification of a full /empty cylinder. Additional function of applying a padlock to lock the device in place, to prevent unauthorized activation of the valve.
- Inner size - 85 mm dia x 150 mm depth.
- Designed with the stem hole dia of 35 mm.
- Made of polystyrene plastic.

PNEUMATIC LOCKOUT

RSG - PL 3W

Isolate pneumatic energy without the expense and inconvenience of installing in-line lockout valves. These quick connectable lockouts are applied to the male fittings, isolating equipment from all compressed air sources.

PNEUMATIC LOCKOUT BOX TYPE

- Accommodates male air hose connectors as well as their electrical plugs (110 V, 220 V, 550 V Plugs).
- Made of Polystyrene / ABS material; 4 padlocks can be applied.
- Ensures that the male air hose connectors & the plug can't be used until the lock is removed.

RSG - SPLO

RSG - LPLO

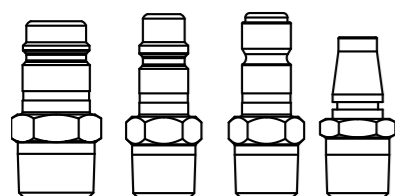

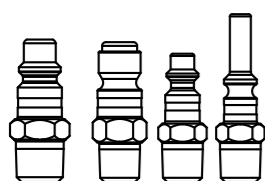

MODEL	PRODUCT DESCRIPTION
RSG - SPLO	Small Pneumatic Lockout
RSG - LPLO	Large Pneumatic Lockout

PNEUMATIC LOCKOUT

This uniquely designed pneumatic lockout fits virtually on all pneumatic fittings used in manufacturing facilities. The pneumatic lockout is applied to the fitting to prevent it from being reconnected to the pressurized air source.

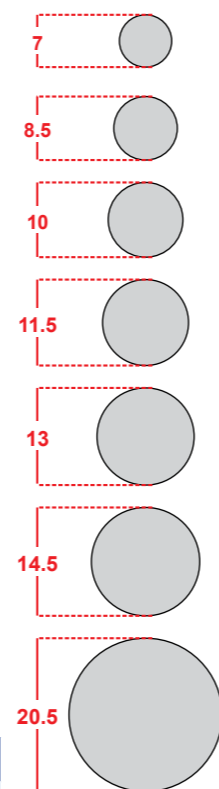

- Made from Stainless Steel solid sheets - to make them strong, durable and resistant to corrosion.
- Easy to use, just place over the male fittings between the two parts and apply your lockout padlock.

RSG - PL 9 H

MODEL	PRODUCT DESCRIPTION
RSG - PL 9 H	Pneumatic Lockout - Straight with 9 Holes

Hole Sizes (mm dia.)

Plug lockouts prevent electrical plugs from being inserted into a wall outlet. It is used when the plug is not under the exclusive control of the person performing service or maintenance.

ELECTRICAL PLUG LOCKOUT BOX TYPE

Manufactured from sturdy polystyrene / ABS, these units have been developed to completely enclose electrical plugs to prevent a machine from being energized. The plug completely sits inside the unit with the cable being fed through an access hole. The small unit is suitable for a variety of electrical connections up to 40 mm diameter, with a locking mechanism that can accommodate up to 4 safety padlocks. The large unit is suitable for standard and larger electrical plugs, including 3 phase connectors.

- Plug lockout prevents electrical plugs from being inserted into a wall outlet.
- Small 110V plug lockout : 80 H x 44 D x 42 W mm with ½” diameter hole for cable.
- Large 220V / 500V plug lockout : 155 H x 86 D x 84 W mm with 8.5 to 19 diameter holes for cable.
- Completely encloses electrical plugs to prevent accidental re-connection.

RSG - LPCL + P

These patented new designs of Electrical Lockout Devices are ideal for locking out Pin and Sleeve surface mounted or trailing sockets & Plugs. They prevent electrical accidents and the unauthorised usage of plugs during servicing / maintenance. Commonly used in Industries like - Steel, Bottling, Engineering, Cement, Mining, Processing, Automobile, Offshore, Dairy, Manufacturing, etc.

**PIN & SLEEVE
SOCKET LOCKOUT**

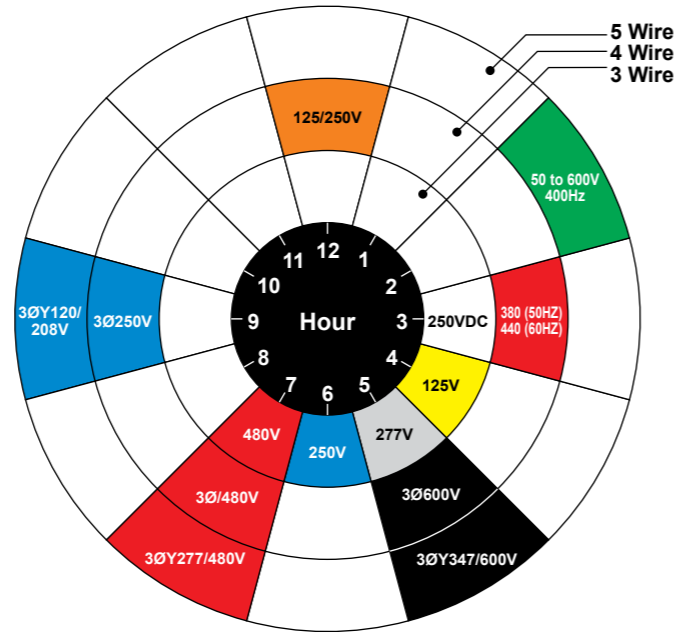

RSG - P&S - SL: Simply insert the locking device into the FEMALE SOCKET. Bring over the socket flap to hold it in place and lock it with suitable Lockout Hasp & Padlock.

FEATURES:

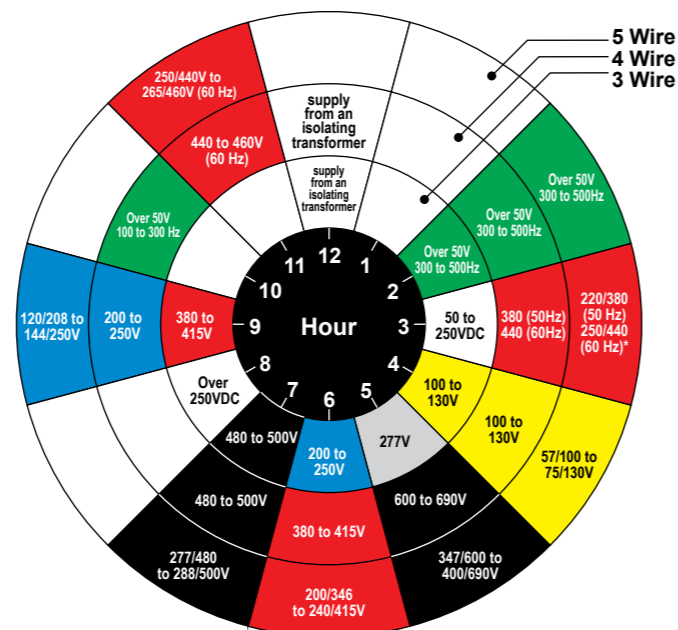

- OSHA Lockout / Tagout regulation 29CFR 1910.147 Compliant.
- RSG - P&S - SL are available in 4 sizes to block socket of 110V, 16 Amp to sockets of 400 V, 63 Amp (to accommodate a full range of electrical plug designs and ratings) Protect against unexpected start up of equipment during maintenance and repair work.
- Discourages unauthorized use of tools and equipment.
- Made in High-visibility red / yellow colour for easy identification.
- These reusable and durable product are made from polypropylene.
- Supports good practice in the control of hazardous energy and 'lockouttagout' procedures (LOTO).

MODEL	PRODUCT DESCRIPTION
RSG - P&S - PL	Pin & Sleeve Plug Lockout

As per OSHA, all energy sources should be turned off and locked out to protect employees from injuries caused by the accidental startup of equipment under repair and service. To aid in complying with OSHA 1910.147, we offer a complete range of high quality, universal Circuit Breaker Lockout Devices to ensure that electrical energy sources are isolated for optimal work place safety. These Circuit Breaker Lockouts are part of an extensive line of innovative safety devices designed by professionals to protect employees from risks associated with hazardous energy, while meeting safety and regulatory requirements.

CIRCUIT BREAKER LOCKOUT

MINIATURE CIRCUIT BREAKER LOCKOUT

- Safe & Effective method for locking out Miniature Circuit Breakers.
- Push Button / Slider type MCBL - does not require any tool for installation.
- The Tie Bar style lockout has a convenient thumb wheel for quick application on multiple breakers.
- Can be applied on single / multiple breakers.
- A Padlock should be applied on these lockout devices.

The first three devices in each range work by engaging wire pins into small holes located on either side of the MCB switch toggle. In order to engage the pins into the holes, they have to be exposed further. On the Conventional Type, this is achieved by pressing the spring loaded black plunger with the thumb. On the Premier Type, the two halves of the lockout device hinge apart. In the Slider Type the upper part of CBL is pulled back for releasing the pins & pushed back for locking purpose.

The Tie Bar & MCBL offers a degree of universality. Both can be used on multi-pole breakers which are operated with a tie-bar. MCBL is fixed to the breaker using a small screw driver.

CONVENTIONAL	PREMIER	SLIDER
 RSG - PIN IN CBL	 RSG - PIN IN PCBL	 RSG - PIN IN SCBL

RSG - EU MCBL - R	Europa Miniature Circuit Breaker Lockout - Red

CIRCUIT BREAKER LOCKOUT

CLAMP ON BREAKER LOCKOUT

- Extremely versatile - works on wide range of single-pole and internal-trip multi-pole breakers.
- Three sizes available, for 120 / 277 V breakers & for 480 / 600 V. The large lockout fits on breaker switches up to 21 / 4" wide and 7 / 8" thick.
- Made of rugged polypropylene and impact modified nylon.
- Use twister screw to clamp lockout securely onto switch tongue, then pull cover over thumbscrew and lock in place to prevent clamp from being loosened.
- Detachable cleats (included) expand the range of applicable breakers.
- Accepts locks shackles up to 9 mm in diameter.

RSG - COBL - L

MODEL	PRODUCT DESCRIPTION
RSG - COBL - S	Clamp On Breaker Lockout - Small for 120 / 277 V breakers
RSG - C / COBL - S	Cleat for Small Clamp On Breaker Lockout
RSG - COBL - M	COBL - Medium for 480 / 600 V breakers
RSG - C / COBL - M	Cleat for Medium Clamp On Breaker Lockout
RSG - COBL - L	COBL - Large fits on breaker switches up to 21 / 4" wide and 7 / 8" thick
RSG - COMBO COBL	1 Piece each of all the COBL (Small, Medium & Large) + 2 Cleats

CIRCUIT BREAKER LOCKOUT

LARGE CIRCUIT BREAKER LOCKOUT

- Locks out a wide range of three phase Circuit Breakers (227 V & above).
- Fits on lever of Circuit Breaker upto 3" wide & 0.9" thick.
- Handy Device : makes it easy to secure the Large Circuit Breakers at any workplace.
- Rugged Stainless Steel / PVC Constructions.
- Corrosion resistant.
- Easy installation - simply turn the screw into the circuit breaker handle & add your own Padlock & Tag after fitting it properly.

Brass threaded insert is used for smooth operation of screw.

CIRCUIT BREAKER LOCKOUT

TOOL FREE - CIRCUIT BREAKER LOCKOUT

Brass threaded insert is used for smooth operation of screw.

- Specially designed to be used on electrical MCBs & MCCBs.
- Fixation with a thumb twister screw for fast and easy installation.
- Special construction in thermoplastic material resistant to chemicals.
- Withstand extreme environmental conditions.
- Locks off, most of the miniature ISO / DIN circuit breakers.
- Since twister screw is hidden under the cover, it prevents removal of TF CBL.
- Safety padlock / lockout hasps of up to 6 mm can be applied horizontally or vertically.
- **Both pointed & flat screws are supplied with each piece.**

CIRCUIT BREAKER LOCKOUT

LARGE CIRCUIT BREAKER LOCKOUT

RSG - TS - SPBL

RSG - MPBL

RSG - SPL

RSG - DPL - L

RSG - UMP BL

RSG - TS - SPBL: This lockout fits right into the switch. Mount in place over "off" position switch and secure with a padlock. Fits most major brand, single-pole breakers.

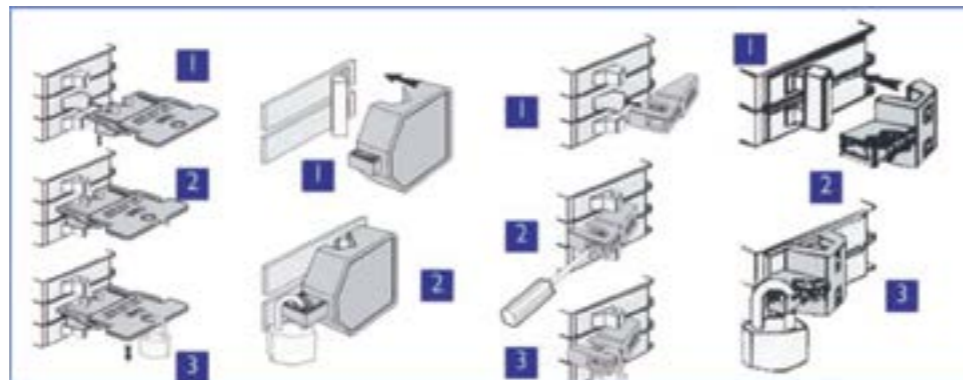

RSG - MPBL: Circuit breaker for voltage 120 / 277, requires the breakers to be connected with a cross bar.

RSG - SPL: A single pole lockout that does not require a switch breaker with a recessed hole in it. Circuit breaker lockouts are made of durable polycarbonate material and are quick and easy to apply. "No Hole" Circuit Breaker Lockout is designed to fit circuit breaker toggles up to 1/2" wide without a recess hole in the toggle.

RSG - DPL - L: A double pole lockout, similar to MPBL but slightly larger to accommodate larger breakers. This circuit breaker lockout is now available for either single or double pole circuit breaker lockout applications.

RSG - UMP BL: This clamp-on type circuit breaker lockout is a single device that can be used with most major multi-pole breakers that employ a tie bar. Easy to use, it is made from durable glass-filled nylon with a stainless steel screw. This versatile device is compatible with most of the branded manufacturers, such as GE, ITE, Sylvania, Cutler-Hammer, Challenger, Bryant, Siemens, Square D and General Switch Company. 120/ 277 VOLTS.

To use, just secure the clamp lockout over the tie bar by tightening the thumbscrew and insert padlock to prevent the clamp from being loosened.

CIRCUIT BREAKER LOCKOUT

UNIVERSAL GOLDEN TOGGLE MCB LOCKOUT

RSG - UGT - MCBL

- Possibly the simplest yet most versatile MCB lockout in our range.
- The GOLDEN TOGGLE LOCK fits over most of the MCB switch toggles and is secured in place using a small flat blade screwdriver to turn the grub screw.
- Once tight & secure, insert your Padlock / Hasp that blocks access to the grub screw, so that the device could not be removed until the lock is removed.
- Works perfectly even where PIN IN / PIN OUT / PINOUT WIDE CBL fails.

MODEL	PRODUCT DESCRIPTION
RSG - UGT - MCBL	Universal Golden Toggle - Miniature Circuit Breaker Lockout

UNIVERSAL MULTI-FUNCTIONAL CIRCUIT BREAKER LOCKOUT

RSG - UMF CBL

- Designed to fit most MCBs and main switches. Our UMF CBL is ideal for use on domestic and industrial applications.
- Extra length clearance on the toggle side allows the device to be used on breakers with extra long toggles, as well as the standard size.
- Thicker main switches are accommodated on the opposite side making this 2-in-1 device truly multi-functional in today's market.

Brass threaded insert is used for smooth operation of screw.

BLOCKING BAR LOCKOUT

For the first time in the world Blocking Bar Lockouts for the computerized digital panels of machines are being made by RSG - New Delhi, India. it helps in restricting the access to the touch buttons on the screen of the electrical panels so that they can not be operated under any circumstances.

BLOCKING BAR LOCKOUT

BLOCKING BAR LOCKOUT

- Lockout your oversized & irregularly shaped switches with our BBL: Blocking Bar Lockout.
- Self-adhesive bases are permanently installed on electrical panels / switches directly.
- Simply clean panel surface and adhere; No drilling required.
- Red blocking bar indicates locked off, green bar indicates locked on.

BLOCKING BAR LOCKOUT

Now you can protect your control panel from unnecessary fiddling and lock them with the help of Blocking Bar Lockout kits.

No matter, what kind of HT / LT, Electrical Panels you have in your facility - We have some or the other lockout device for your Switches, MCBs, MCCBs, Breakers, Isolators, Push Buttons, Emergency Stops, Levers, Panel Door Knobs / Locks, Handles, Fuses, etc.
And if not - We will be glad to create one for you without obligation.
You just have to send us the switch / article for the same.

ELECTRICAL PANEL LOCKOUT

ELECTRICAL PANEL KNOB LOCKOUT

Twisting top cap lockout is used for restricting the access to the electrical panel door locks / knob / screw.

- RSG - EPKL - EL can be installed, where the panel door lock can not be removed.
- RSG - EPKL - BTL can be installed by removing the lock from the panel door and placing the base of LBTL before inserting the lock in the hole and tightening from the back.
- RSG - EP - BSL base is placed at the time of tightening the bakelite screw to the panel door. Twisting top cap is placed for lockout purpose.
- RSG - EP - SL base is placed at the time of tightening the slotted washer head screw to the panel door. Twisting top cap is placed for lockout purpose.

ELECTRICAL PANEL LOCKOUT

LOCKOUT GRIPPER

- Safe & effective method for locking out L & T & other Breakers.
- The lockout can easily be installed with the aid of super strong adhesive backing.
- It can be used for on & off positions.
- In order to lockout the switch a padlock should be applied on the gripper.
- Has 26 x 31 mm space for lever locking.

RSG - GRIPPER

MODEL	PRODUCT DESCRIPTION
RSG - GRIPPER	Lockout Gripper

SLIDER TOGGLE LOCKOUT

This versatile lockout device prevents the accidental activation of large circuit breakers and can work on a wide variety of flip lever style handle switches. It is made of red de - electric ABS plastic, consists of two parts: Mounting base & Slider bar.

It installs quickly and easily with rivets or screws; installed after drilling hole in the panel body.

Mounting base has a dia of 2" and slide bar measure to 5" long and 1" wide with a provision for providing a lockout padlock.

RSG - STL

MODEL	PRODUCT DESCRIPTION
RSG - STL	Slider Toggle Lockout

ELECTRICAL PANEL LOCKOUT

These LOTO units have been designed to lockout electrical panel buttons and switches with no inbuilt lockout provisions. Available in various different designs, they all work in a 2-stage operation. The base plate should be attached directly onto the electrical panel over the top of the relevant switch using the super strong adhesive Backing/Riveting/Bolting. When in place, the electrical plugs/switches/buttons can be isolated by placing the house unit over the top of base plate - hence preventing the access to the isolated switch. Then, they can be locked in place with a Lockout Padlock. The circular units are designed to fit over most of the universal type push / mushroom panel buttons and the square units are designed for the switches with levers. For the switches with extended handles - we have the special patented lockout solutions that freeze the movement of these switches to a still position where they need to be locked at a specific angle.

- ★ This complete range of products can be cut from any side/direction to suit the installation on different panels with varied wiring/attachments to the switches/conduits, levers protruding out or of different shapes.

Manufactured from sturdy special grade transparent material, each unit has been developed to completely enclose electrical plugs to prevent machines from being energized. The plug completely sits inside the unit.

- ★ If more than one unit on a single panel needs to be locked out - we recommend the use of our De Electric Squeezer lockout (RSG - SMCL - YB) with the yellow cable being fed through the access holes of these electrical lockouts and locked at one location by multiple users.

Customization accepted

**ELECTRICAL PANEL
HOLE LOCKOUT:
ELLIPSE**

- Safe & effective method for locking out electrical panel holes.
- Padlock can be placed for locking / isolating.
- This lockout can be easily installed by just removing the back strip from the double sided super strong backings.
- They are Virtually Transparent.
- 42 x 70 mm inner space.

RSG - EPHOL EL

MODEL	PRODUCT DESCRIPTION
RSG - EPHOL EL	Electrical Panel Hole Lockout - Ellipse

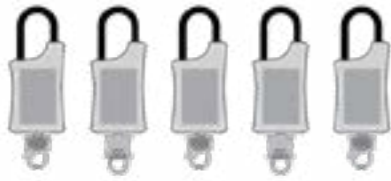

Our Lockout Padlock range give you the physical tools to help you implement and maintain an effective Safety Lockout program as per your own OSHA Policy & Procedures and your own Energy Control Program, to prevent accidents and protect your employees.

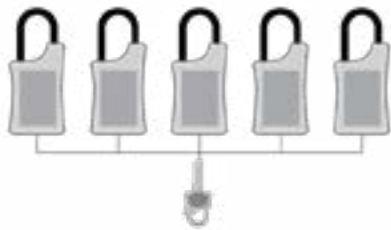

Safety Lockout Padlocks are available in range of colors to increase visibility and allow workers to readily see if a device is isolated. Padlock numbering / Metal Tagging, Etching on Shackle, Logo and Department Labels, photographs of employees or employee codes etc. on the personalized locks are also available on request and at an extra cost.

LOCKOUT SAFETY PADLOCK

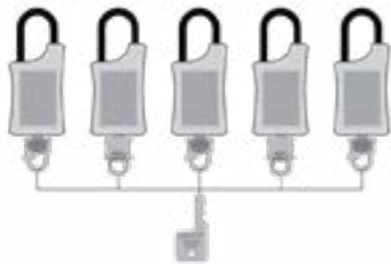

KEYING OPTIONS

Key Different means that every lock has its individual key and the key for one lock can not open another lock in any case.

Key Alike means all locks in a set can be opened with the same key.

Master Key can be used to open multiple locks that are keyed differently.

OSHA LOCKOUT / TAGOUT REGULATION

1910.147(c)(5) OSHA lockout Device requirements state that lockout devices must:

- Be provided by the employer.
- Be standardized by size, shape or color.
- Be distinguishable from locks used for other purposes. Lockout locks should only be used for lockout.
- Identify the individual who applied the lock (both tags and lock labels are acceptable for this purpose).
- Be capable of withstanding the usage environment and must be strong enough to prevent removal except by using excessive force with special tools, such as bolt cutters.
- Most importantly, whenever lockout devices are applied, they must remain under the exclusive control of the individual who attached them. No employee should be able to open a lock attached by someone else.

Kindly select the padlocks carefully as per your requirements.

- Shackle Type / Shackle Size / Padlock Body Color
- Key Alike (means all the supplied locks have one common key)
- Key Different (means that all the supplied locks can be opened with their respective keys only)
- Key Different + Master Keys (means that all the supplied locks can be opened with their respective keys + with one master key)

Number of extra keys required. They can be supplied against the confirmed order and at an extra cost.

Attention!

Choose the Lock that suits your requirement

LOCKOUT SAFETY PADLOCK

PREMIER LOCKOUT SAFETY PADLOCKS: METALLIC SHACKLE

Compact high security PREMIER LOCKOUT SAFETY PADLOCKS were designed on the basis of the feed back received from more than 2,000 users. The nylon body is carved / designed with ribs for easy gripping and handling. Supplied with an individual unique coded brass key and cylinder to differ 6-pin locking combinations. The Jack locking key mechanism does not allow the release of key, until the shackle is closed and the padlock is locked.

- 6-pin precision-machined cylinder for extra security.
- Re-inforced Nylon body is non-conductive, non-sparking and resistant to chemicals and corrosion.
- Colour coded for easy identification, they can also be supplied with photo luminescent labels that glow in the dark. Supplied with individually coded keys for optimum security.
- **Each padlock is supplied in a box with 1 key.**
- Available in Hardened Steel shackle or with Stainless Steel Shackle (in 25 / 46 / 85 mm shackle sizes) SS shackles are used for corrosive industrial / offshore environments.
- Most popular combination of Master Key locks is of 5 Key Different locks with 1 master key.
- Locks of any size / combination / colour or shackle types can be made & supplied on request.
- Locks with longer size body and with extra large sized shackles are also available in all the combinations & colours.

OPEN LOCKOUT STATION

One Piece Safety Lockout Stations are designed to hold Lockout Padlocks, Hasps and Tags at a central location making them accessible to all for isolating equipments easily. These stations come with bold headings and act as a constant reminder to all the personnel to lockout before commencing maintenance work. Built for the toughest conditions, these moulded lockout stations are made from special grade polystyrene mix. Lockout stations can be supplied with or without contents.

OPEN LOCKOUT STATION

ONE PIECE OPEN LOCKOUT STATION

Available in 7, 16 & 48 lock combinations. The 48 Lock Station can further be extended in multiples of 24 by joining the fragmented pieces together. The front label can be designed and supplied as per the customer's requirements in their own language / text / graphics, with or without their logo etc.

KEY CABINETS

These quality range of key cabinets offer a simple and affordable solution to your key storage requirement. To manage the keys of lockout padlocks systematically, it is very important to use key cabinets for easy access at the time of requirement and to make the LOTO system functional. They are made of special grade metallic sheet & have locking arrangement.

- Sturdy steel cabinets, with tough powder coated yellow finish.
- Supplied with security lock and 2 keys.
- Clear front allows quick visual check of 'keys out' without unlocking the cabinet.
- 4 wall mounting holes are pre punched at the base plate of the panel for an easy installation.

SAFETY LOCKOUT BOXES

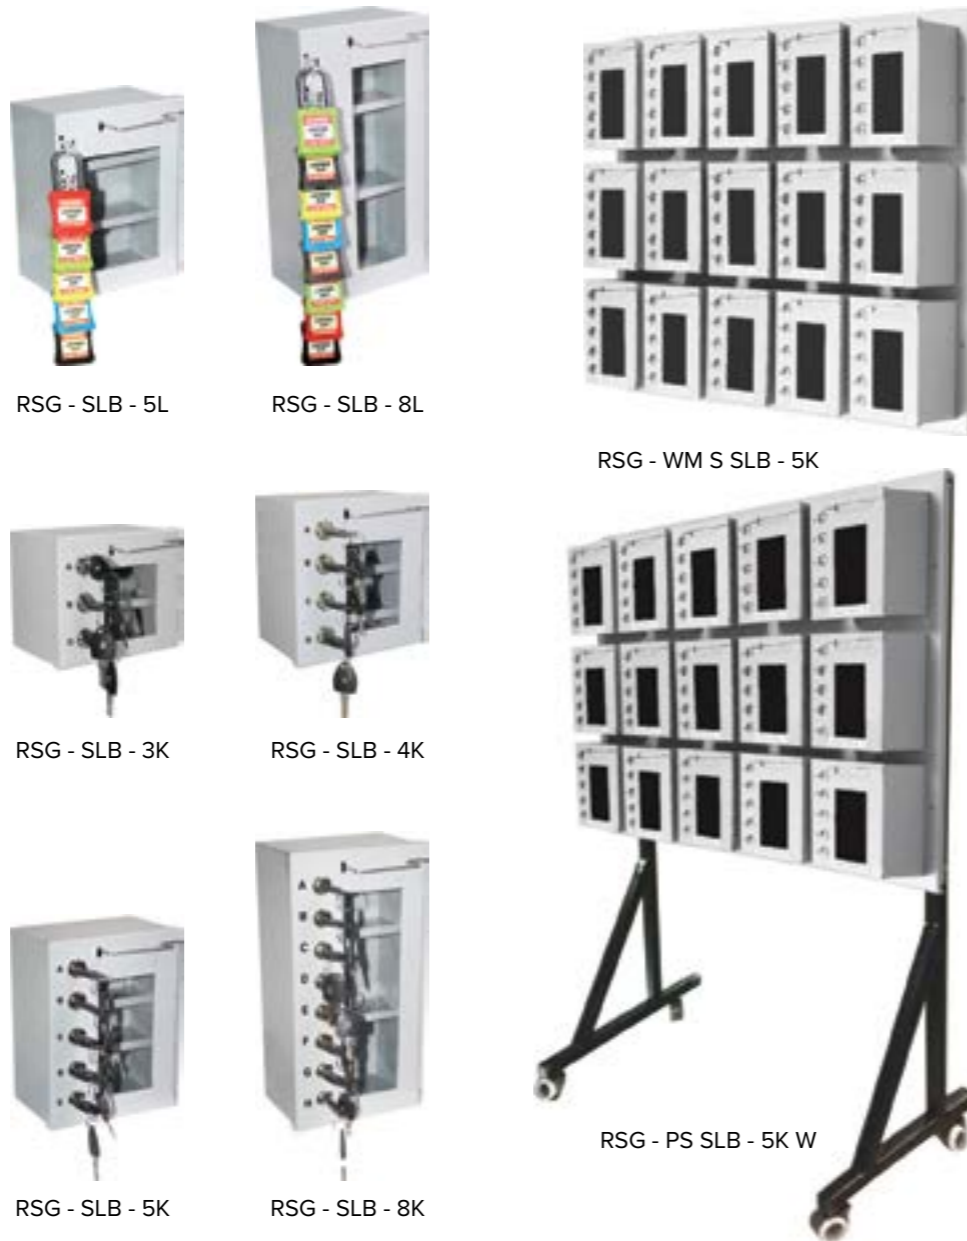

Safety lockout boxes are ideal for group lockout situations. After the equipment to be worked on has been locked off, all lockout keys / fuses etc. are placed inside the lockout box and locked by the authorised person.

In the RSG - SLB - 5L & 8L model each worker puts his own padlock and retains its key, ensuring access cannot be gained to the keys / fuses etc. kept inside the box - until the work is completed. Only when all locks are opened the lockout keys and fuses can be accessed.

Locks can be procured separately as per requirement.

RSG - SLB - 3K, 4K, 5K & 8K model are supplied with inbuilt cabinet locks which can not be removed from their slots.

- Control keys can be "key alike" for multiple boxes under the control of the responsible person (Control Key).
- All secondary keys are "key different".
- Keys can be provided with individual identification key chains.
- All the boxes have A, B, C,..... or 1,2,3,..... marking for individual locks, which can be customized as per customer's requirement. The keys black portion also have the same numbering / marking as given on the boxes.
