

PIPE PLUG KIT

For first responders, recovery and clean-up.

Quickly plug leaks the safe way. Flow-through plugs allow liquids and fuels to be blocked, pumped or drained from transport trucks, rail tankers and many other types of fuel tanks or liquid chemical tanks.

Sava Pipe Plug Kits meet and exceed DOT approved guidelines. All parts are electrostatic and friction spark protected. All metal parts are corrosion resistant. Special rubber compounds insure adequate resistance to various chemicals, fuels and liquid hydrocarbons. Assortment of multi-size pipe plugs to fit pipes from 1/8" up to 6" in diameter. Each pipe plug has multiple uses and each plug fits a range of pipe sizes. Kit includes rubber pipe plugs, cork assortment, Pelican case, grounding straps, CO₂ power inflator with integrated back-up hand-pump, and several self-grounding extension hoses. Take as-is or mix and match to meet your specific requirements. Larger plugs are available. Sava inflatable pipe plugs come in a range of sizes from 1" up to 96" in diameter.
