

## Eye Wash Bottle

### UEWB 12

Permits emergency flushing for the crucial first few seconds of an eye injury by flushing the eyes in the event of an accident involving acids, caustics and other water-soluble irritants.

The Eye cup is specially designed to give the eyes as much water as possible without unnecessary spills, while also helping to keep the eye open.

The snap-on dust cover prevents air borne contamination

The drain tube provided removes all used fluid preventing the contamination fluid from entering into the bottle.

Portable. Light-weight, easy to use at any work place.
