

VACUUM DRAINAGE BAG

Vacuum drainage bags use suction to attach to tanks or containers. Vacuum drainage bags need no belts or tightening chains.

The vacuum is achieved using the included venturi pump which is operated using compressed air.

Vacuum drainage bags work very well on flat surfaces where belts don't perform as well. Attach bags to any flat or large radius tank with smooth surfaces.

Stainless steel drain allows controlled transfer of liquids from the tank through the bag.

Vacuum leak drainage bag

Part Number		528345
Size	Ø mm	500
Sealing surface	Ø mm	500/200
Required Inflation Pressure	bar	8
Vacuum	bar	0.85
Weight	kg	5.4

Sava vacuum TB 50 SET consist of:

Code	Description	Quantity	Weight (kg)
76686	Bag Inflation hose - 8 mm, 10m, yellow	1 x	1.20
528345	Leak Sealing Vacuum bag TB - 50 mm	1 x	5.40
529103	Ball valve, storz D, stainless	1 x	0.55
529153	Transparent venting and drainage hose, 5 m, storz D	1 x	1.40
