

## VICO PORTABLE SMOKE GENERATOR

**The world's most reliable  
smoke generator is now  
cordless.**

HAAGEN smoke generators meet the tough demands of firefighter training.

The cordless VICO allows firefighters to train anywhere. Add smoke into places where running power cords is impractical, such as the upper floors of your training building. The VICO is the perfect addition to your training products.

With a warm up time of 1-2 seconds, the VICO instantly produces a dense, thick smoke without leaving a residue. With the smoke release button built into the grip, you can operate with the VICO with one hand, also with a glove on.

## FEATURES/ADVANTAGES:

**Cordless:** the VICO is battery operated, making it perfect for training in locations where it is inconvenient or even impossible to use power.

**Portable:** the VICO's built-in battery allows instructors to easily add smoke to upper floors in their training buildings, vehicles, false ceilings, machinery, hallways, corridors and staircases, or outside training grounds where power isn't available or easily accessible.

**Minimal heat-up time:** in one to two seconds the VICO heats the smoke liquid to the ideal temperature. Simply press the button for instant smoke.

**Lightweight:** the VICO weights only 8 kg, making it light enough for single hand operation and mobile uses.

**Long-lasting battery:** the VICO can be run continuously for 25 minutes and much longer when using smoke intermittently, producing the same high quality smoke during the first and last minutes of training. The battery can be easily swapped out in the field for uninterrupted training.

**Easy operation:** push button, single gloved-hand operation. The VICO requires no configuration or programming. Users can adjust smoke density and create smoke bursts or set the output to continuous run.

## TRAINING OPPORTUNITIES:

- > Use the VICO in conjunction with our ETNA or VESUVIUS smoke generator to easily add smoke to secondary rooms and floors of your training building
- > Use in conjunction with a Jeff or Thomas SmartDummy for victim extrication training and search and rescue training
- > Add realism to transportation, maritime and aviation training
- > Add smoke to vehicle extrication training
- > Because of its portability, easily add smoke to dustbins, false ceilings, machinery, hallways, corridors and staircases, or outside training grounds where power isn't available or easily accessible

## SPECIFICATIONS:

Power requirement	: 500W
Battery	: Rechargeable lithium-ion
Heat-up time	: 1-2 seconds
Fluid tank capacity	: 700 ml
Fluid consumption	: 12 ml/min.
Smoke production	: 150 m <sup>3</sup> / min.
Continuous run time	: 25 min.
Weight incl. battery	: 8 kg (full tank)
Dimensions (L x W x H)	: 332 x 133 x 238 mm
